

"SS" Series Mini Centrifugal Pumps

The "SS" Series range of swimming pool and spa pool pumps are designed for the most domestic pool filtration applications. The high performance pump is manufactured from a premium grade UV stabilized reinforces thermoplastic material, incorporate with an up grade corrosion resistant aluminum motor housing as a standard heavy duty accomplished for its quieter operation.

Standard features include:

- * See through trap lid eliminates the guess work, for knowing when the basket needs cleaning.
- * High set of ground insulated motor cradle for water and corrosion protection.
- * Rapid self priming capability with patented internal heat sink ensures minimum cooling of the seal, extends shaft and seal life.
- * Through test repeatedly, guarantee the real output power.
- * Low cost of spare parts.
- * IP55 Waterproof Standard.
- * CE Europe Standard
- * Five-Year Limited Pump Housing Warranty.

TECHNICAL CHARACTERISTICS

Model No.	Power (kW)	HP	Length (mm)	Width (mm)	Height (mm)	WeightPort (kg)	Size (inch/mm)	Voltage (v)	Phase
SS050	0.37	0.5	485	155	278	8.03	1.5/40	220/380	1 / 3 Phase
SS075	0.55	0.75	485	155	278	9.01	1.5/40	220/380	1 / 3 Phase
