▶ **Nano Tech UV-C Timer**

Emaux Nano-Tech UV-C Timer includes an integrated TIMER which accurately monitors the operating hours of the UV-C lamp. You will be reminded when the lamp must be replaced.

● **Advantages of the Nano-Tech UV-C Timer**

· User-friendly control pad with time clock and time meter display.
· Integrated adjustable time meter for the UV-C lamp.
· Digital indication when the lamp needs replacing.

● **Main Applications**

· Residential swimming pools.
· Fish ponds.
· Drinking water residential treatments.

▶ **Nano Tech UV-C With Amalgam Lamps And Flow Switch**

The amalgam lamps set between the low pressure and medium pressure UV applications, by combining high efficiencies with relative high power densities operating in a broad temperature range.

The amalgam version includes a flow switch which will cut-off the lamp power to protect the system from over-heating when the water flow is lower than required.

By applying a special coating technology, we are able to guarantee a maintenance of 85% after 12,000 hours operating in a broad temperature range.

Optional Timer version is included.

● **Main Applications**

· Municipal drinking water treatment systems.
· Municipal waste water treatment systems.
· Process water treatment units.
· Swimming pool treatment systems.
